## *World-Leading Legionella Experts*

Legionella Control International are world leading legionella and water safety risk management experts providing independent and impartial advice covering the control, management and prevention of Legionnaires' disease, legionella, pseudomonas and other waterborne pathogens that contaminate man-made water systems.

*Safeguarding People,  
Protecting Your Reputation*

*You're in safe hands with us*

Combining unparalleled risk management expertise, comprehensive capabilities and extensive research in our specialist areas of operation we are recognised as world leaders in what we do. Working throughout the United Kingdom and internationally we collaborate closely with clients to improve water safety management processes and reduce organisational risk to create better, safer environments for all.

### **Legionella & Water Safety Risk Assessment**

World-leading legionella and water safety risk assessment specialists. Our experienced engineers have the expertise to perform a detailed examination of any engineered water system to identify and assess the risks from legionella bacteria, pseudomonas and other waterborne pathogens.

### **Classroom Training**

Our experienced tutors deliver a comprehensive range of City & Guilds accredited legionella and water safety training courses from introductory awareness to advanced levels. With a full schedule of public courses, we also deliver training exclusively for clients at their premises.

### **Online Training**

Learn at a time and location convenient to you with our City & Guilds accredited online legionella training courses. Internationally recognised, cost effective learning solutions, ideal for large teams, remote staff or where flexibility is essential.

*What We Do*

*Expert Water  
Safety Solutions*

**Legionella<sup>®</sup>**  
control

### **Legionella Water Analysis**

Fully accredited UKAS laboratory testing for the accurate detection of legionella, pseudomonas and other waterborne pathogens that contaminate man-made water systems. Plus post testing support from expert microbiologists and water engineers.

### **Expert Witness & Litigation Support**

Specialist expert witness and litigation support covering Legionnaires' disease and the control and management of legionella risks. Our expert witness team advise on a range of technical, scientific, environmental and engineering subjects associated with Legionnaires' disease and legionella risks within the built environment.

### **Crisis Support & Reputation Management**

Legionella contamination of water systems and outbreaks of Legionnaires' disease do happen... and when they do they can be incredibly disruptive, expensive to resolve, may involve litigation or prosecution and can seriously damage reputations if handled incorrectly. Our crisis management specialists have extensive international experience supporting clients through the toughest of times to protect their people, business and reputation during a crisis.
